Spatial Information

AOC is South Africa's first full service spatial information company. Our advanced capabilities are built upon the core disciplines of surveying, aerial survey, mapping, data modelling and Geographic Information Systems.

We provide a range of advanced systems for the collection, storage, analysis and presentation of spatial information.

Our leading position is reflected by the growing list of South African and international clients utilising our resources and industry experience.

AOC provides current and accurate spatial information which supports your operations. Our expert application of leading edge technology provides an essential input for decision making.

AOC PROJECT DEVELOPMENT APPROACH

Experience

Our reputation is the product of decades of professional experience, development and service delivery, dating back to 1931.

AOC is a team of surveyors, spatial scientists and technicians, located in South Africa and operating in Australia, New Zealand and South East Asia.

AOC has a culture of inquiry, sound scientific foundations, client-focused management, a passion for excellence and professional values.

Safety

Safety is a corporate priority. All staff embrace safety in every aspect of professional practice. This appreciation for safety is evident in the uncompromising standards of safe practice which AOC demands to continue our record of successful surveys on the land, in the air or on the water.

Summary of Services

Proudly Black Empowered

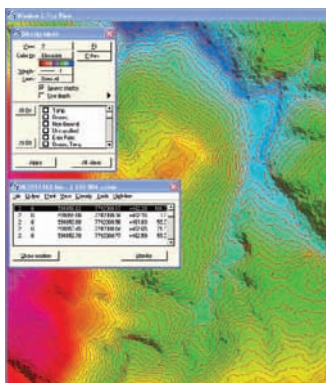

www.aoc.co.za | info@aoc.co.za

Aerial & Satellite Imagery

- Satellite Imagery
- Aerial Photography
 - colour
 - colour infrared
 - oblique
- Digital Aerial Photography
 - colour
 - colour infrared
- Hyperspectral Profiling
- Aerial Film Processing
- Thermal Imaging
- Video Data Capture

GIS Solutions

- Web-based Mapping
- 3D Visualisation & Simulation
- Applications Development
- Real-time Logistics
- Data Management
- Whole-of-Life Project Management
- Vehicle Tracking

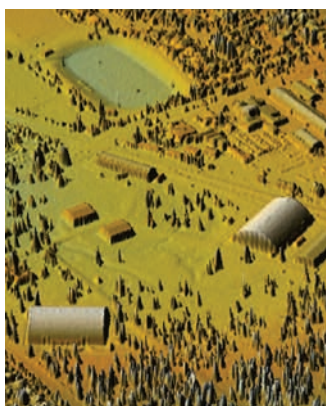

Airborne Laser Scanning

- Corridor Mapping
- Coastal Mapping
- Flood Plain Mapping
- City Modelling
- Digital Terrain Models
- Tree Canopy Models

Photogrammetry & Mapping

- Digital Orthophotos
- Topographic Mapping
- Mine Aerial Survey
- Pit & Stockpile Volumes
- Digital Terrain Models

Land & Marine Surveys

- Construction Set-out Surveys
- Cadastral Surveys
- Hydrographic Surveys
- GPS Surveys

Terrestrial Laser Scanning

- As Built Surveys
- 3D Modelling
- Piping Surveys
- Structural Design
- Plant Up-grade
- Dimensional Control
- Deformation Analysis
